

Creare conexiune PPPoE in Windows 7

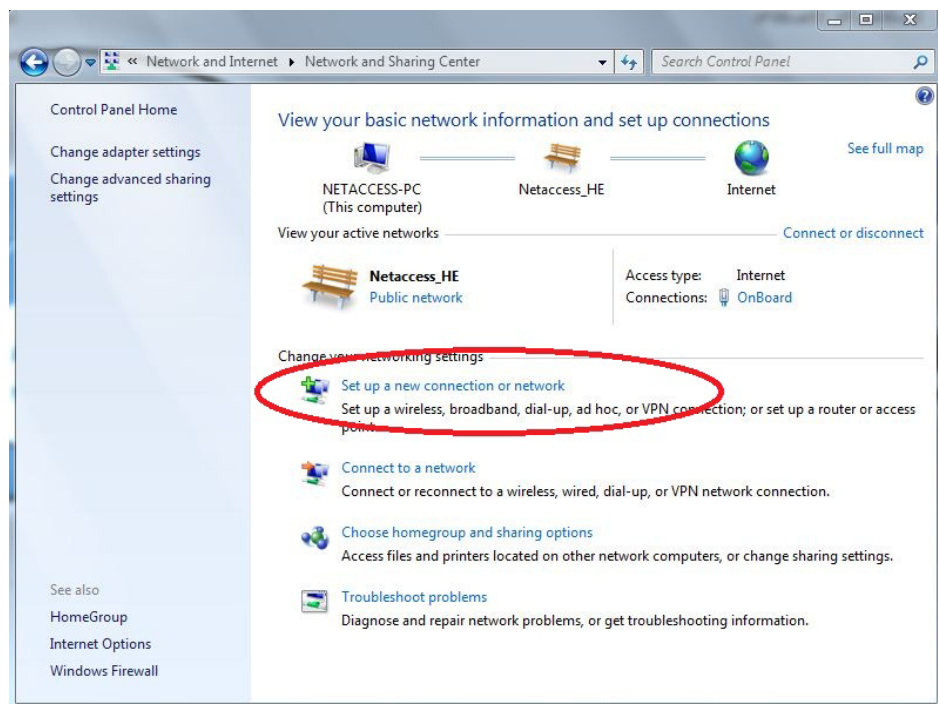

1. Se da click pe butonul “**Start**” dupa care, din meniu se alege optiunea “**Control Panel**” (Fig.1)

Fig 1.

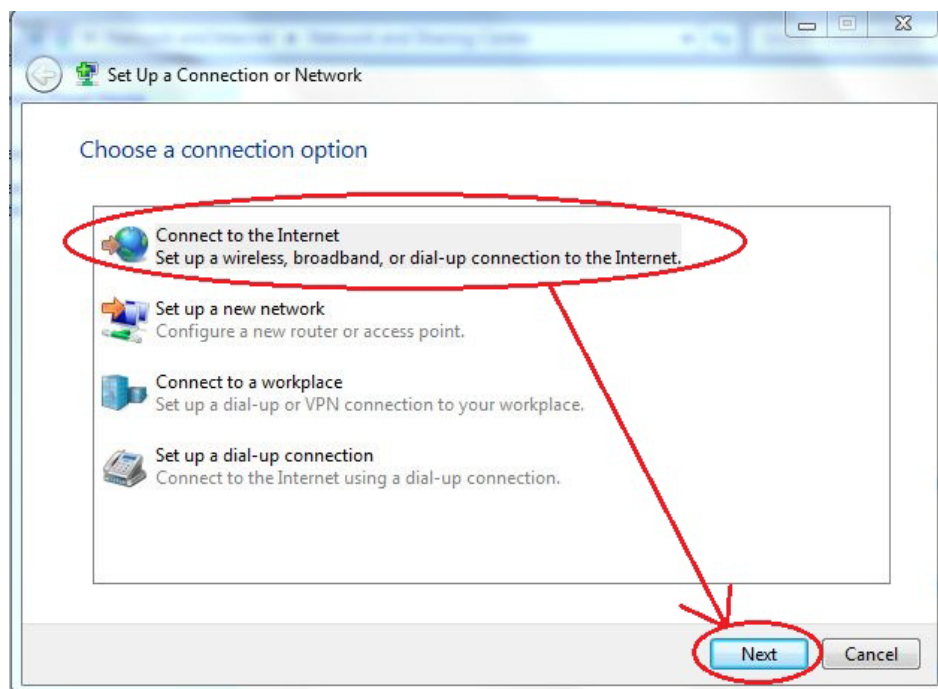

2. Din fereastra nou aparuta se va deschide optiunea “**View network status and tasks**” cu un click stanga. (Fig.2)

Fig 2.

3. Din fereastra nou aparuta se va alege optiunea “**Set up a New Connection or network**” cu un click stanga. (Fig.3)

Fig 3.

4. In noua fereastra se va selecta printr-un click stanga optiunea “**Connect to the internet**”, dupa care un click stanga pe butonul “**Next**” (Fig.4)

Fig 4.

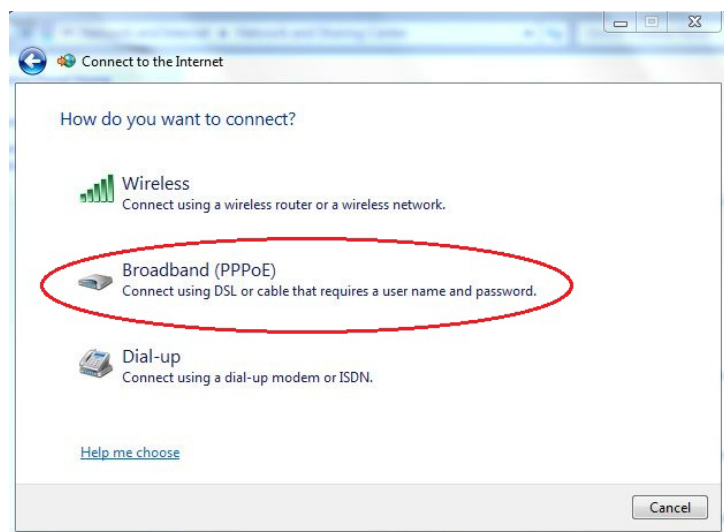

Fig 5.

5. In fereastra urmatoare se va alege optiunea “**Broadband (PPPoE)**” cu click stanga. (Fig. 5)

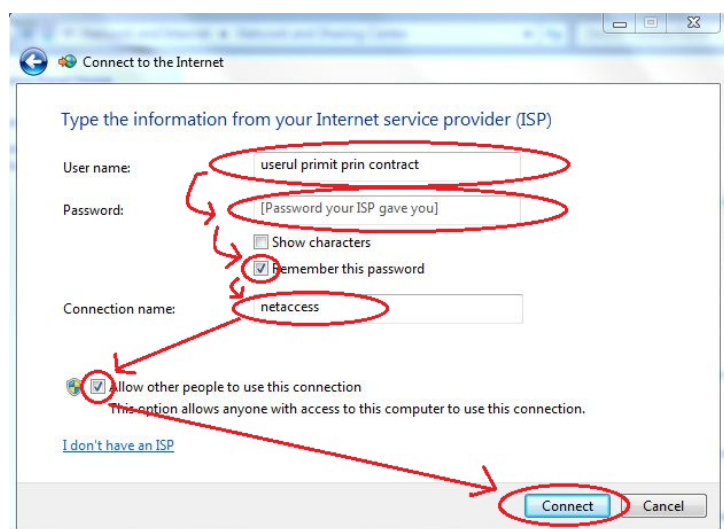

Fig 6.

6. Fereastra urmatoare va contine trei campuri care vor trebui completate dupa cum urmeaza:

- in primul camp, si anume “**User name:**” se va introduce userul primit de dumneavoastra prin contract.

- in al doilea camp, si anume “**Password:**” se va introduce parola primita prin contract, corespunzatoare userului dumneavoastra.

- in al treilea camp, si anume “**Connection name:**” se va introduce denumirea conexiunii, “**netaccess**”

Se vor bifa si optiunile “**Remember this password**” respectiv “**Allow other people to use this connection**”, dupa care se va da un click stanga pe butonul “**Connect**” (Fig.6)

Fig 7.

Urmatoarea fereastra va afisa incercarea de stabilire a conexiunii PPPoE. Daca toate instructiunile de la pasii 1-6 au fost executati corect conexiunea la serverul de internet ar trebui sa se stabileasca si legaturade internet sa fie functionala. (Fig 7.)
